Registration is free and will include refreshments and lunch. Please register by clicking on the email link above and you will receive further details in due course.

Topics will include:

- Demographics and Joint Registry Data
- Mechanisms of failure
- Investigations
- Revision techniques and outcomes
- Research - current and future
- Medico-legal aspects

Meeting Organizers: Jeremy Latham, Southampton General Hospital
Duncan Whitwell, Nuffield Orthopaedic Centre
Richie Gill, Oxford Orthopaedic Engineering Centre

The Metal Hips Research Group was established in June 2010 as the result of an urgent need to bring together orthopaedic surgeons who have performed metal on metal hip arthroplasty, and who were seeing unexpected problems in their patients. The meeting will include surgeons who have between them done thousands of MoM hip replacements and resurfacing, and engineers, pathologists and scientists who have particular expertise in this area. The aims of the meeting are to share our experience, and to provide clear consensus on all aspects of the management of patients with a failed MoM hip arthroplasty.

Kindly sponsored by:

 **WG Healthcare UK Ltd**

 **smith&nephew**

 **zimmer**

The assistance of the British Hip Society is gratefully acknowledged
