This is an outstanding opportunity for senior trainees, and young consultants to apply for British Hip Society industry sponsored fellowships to increase their experience and exposure and develop specific aspects of specialist hip, hip arthroplasty and revision surgery.

Young surgeons who are about to complete their training, those who have recently completed their training, and consultants within their first five years of practice, will be eligible to apply. The candidate should ideally be a BHS member; however applications from non BHS members will be considered when accompanied by a BHS membership application and the support of 2 BHS members

Please note that these are **not** the existing travelling fellowships that were previously run by the BHS. These fellowships will involve the successful candidate spending time in one or a number of specified units and attending educational events to further their understanding, their clinical experience and their practical and technical skills in one, or a number of aspects of hip surgery.

Applications are open now, and should be made by the submission of a CV accompanied by a detailed explanatory expression of interest. Candidates should summarise their hip surgical training and important aspects of their hip career and/or practice to date. The application should include details of their academic and educational profile, their surgical experience and their aspirations for a career in hip surgery in the future.

Specific details regarding the various fellowships on offer are attached. Candidates may apply for one, two, or all three of the fellowships, but should indicate any preference, and the reasons for that selection, in their expression of interest. At the end of the fellowship, the successful candidates will need to produce a report detailing their activities and achievements both for the BHS and for our respective Industry Partner.

Candidates who apply need to be aware that the interviews will take place in Liverpool at the British Orthopaedic Association meeting. Candidates should therefore be available to attend that meeting for interview. The deadline for applications is 25 August 2017, with interviews to take place on Tuesday, 19 September 2017 at the BOA in Liverpool.
