

THE NORTHERN RETRIEVAL REGISTRY

Inaugural Conference

Wednesday, May 3rd 2017
The Baltic, Newcastle Gateshead Quayside

Examination of explanted medical devices can identify factors associated with their clinical success or failure

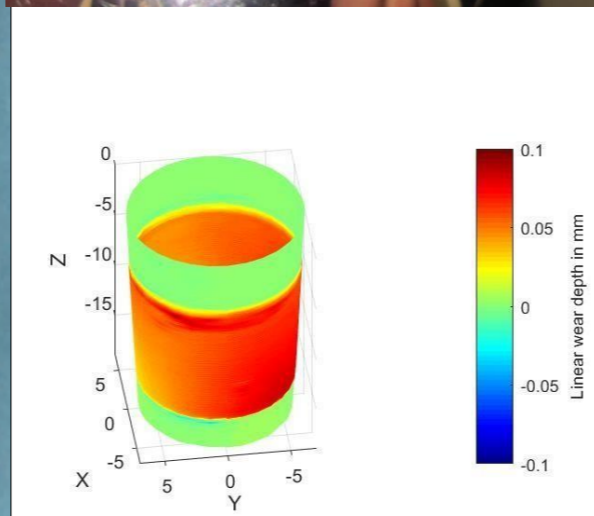

This conference brings together a number of recognised experts in the fields of surgery, medicine and bioengineering to discuss how explant analysis can improve patient healthcare

TOPICS

- Taper junction failure in total hip arthroplasty
- Spinal growth rod failure
- Variations in manufacturing
- Implant wear and tissue reaction
- Routine explant analysis and the NJR
- Economics of a retrieval centre
- Explant analysis and the birth of new designs
